The John Deere 5103 utility tractor is the versatile, durable tractor from the yard to the back forty.

Features:

Powerful 45 HP 3 cylinder PowerTech diesel engine. Strong enough to handle over 100 rear or front attachments like a box blade, posthole digger, front end loader or disk harrow. Its 38 HP PTO rating and its fully independent 540 rear power take off can deliver the power to your implements. You can stop or slow the tractor without disrupting power.

Simple to use transmission with 9 forward and 3 reverse speeds, you will have no problem matching ground speed to the task at hand.

Lift capacity (24" behind hitch ball) of 3050 lbs to handle your selected rear attachments.

Comfortable, adjustable suspension seat with easy to reach, color coded controls. No awkward levers or controls to straddle or hurdle as you get on and off from either side of your tractor.

Easy service points and reliable components ensure your total cost of ownership of this tractor will remain low over its service life.

Optional quick hitch converts the 3-point hitch to fixed hooks and attaching points. All you need to do to attach most rear implements is backup and go.

Rugged and reliable Frontier rear blades, box blades and rotary tillers. Light work to heavy grading, manually adjustable rear blades provide greater control of blade angle and tilt position. Backfilling or leveling, the box blade rugged A frame is welded from heavy-duty plate steel and reinforced with structural supports to provide the durability tough jobs require.

Ease of use and maintenance, the Frontier disc harrow has front notched blades for cutting and mulching while the rear smooth blades slice and mix residue for a smooth finish.

Durability, backed with a 2 year limited warranty, the Frontier Rotary cutters feature a large gear box. A round blade pan plus a rugged slip clutch or half inch shear bolt protects your driveline and gearbox from sudden impacts.
