The John Deere 2305 is the ideal compact tractor for estate and homeowners.

Features:

Powerful 24 HP 3 cylinder Yammmer TNV diesel engine, most power in its class, with 41.7 ft/lbs of torque. Strong enough to handle up to 16 rear, mid or front attachments like a box blade, post hole digger, front end loader, mid-mount mower or disk harrow. Its 18 HP PTO rating and standard independent mid and rear power take offs give you what you need to handle a rotary cutter, mid-mount mower or rotary tiller.

Car-like automatic transmission makes it easy to switch directions. Just press left for forward and right for reverse.

Lift capacity (24" behind link arms) of 681 lbs to handle your selected rear attachments.

Standard 4 wheel drive to give you the added traction over challenging ground.

Three year/2000 hour limited warranty gives you peace of mind. Easy service points and reliable components ensure your total cost of ownership of this tractor will remain low over its service life.

Optional quick hitch converts the 3-point hitch to fixed hooks and attaching points. All you need to do to attach most rear implements is backup and go.

Rugged and reliable Frontier rear blades, box blades and rotary tillers. Light work to heavy grading, manually adjustable rear blades provide greater control of blade angle and tilt position. Backfilling or leveling, the box blade rugged A frame is welded from heavy-duty plate steel and reinforced with structural supports to provide the durability tough jobs require.

Ease of use and maintenance, the Frontier disc harrow has front notched blades for cutting and mulching while the rear smooth blades slice and mix residue for a smooth finish.

Durability, backed with a 2 year limited warranty, the Frontier Rotary cutters feature a large gear box. A round blade pan plus a rugged slip clutch or half inch shear bolt protects your driveline and gearbox from sudden impacts.
